I am a **Senior Fullstack Engineer** with **7 years of experience** looking for **fully remote work** in European or US time zones. I am an expert in Typescript with an eye for design and strong backend skills. I emphasize principled design following a modern DDD approach – prioritizing testing, documentation, automation and refactoring. A great developer experience, a low overhead async workflow and focused leadership is the recipe for success.

Experience

career break ➡

I took a year to ski all over North America, get certified as a wilderness first responder, convert a school bus into a camper and develop hands-on skills.

Anytype / Software Engineer
October 2022 - May 2023 • Berlin (Remote)

Developed desktop client and browser extension for P2P, E2E encrypted knowledge management tool. Responsible for widget/navigation system, slick new onboarding and DevXP.

Qualio / Fullstack Software / Devops Engineer
September 2020 - August 2021 • San Francisco (Remote)
